## ***Enhancing the Energy Transition***

*Winning the global challenge through the creation of skills and competences worldwide and through industrial cooperation*

Climate goals needs competences, that should be created quickly, broadly and in an inclusive way, to educate to climate mitigation and adaptation and to develop innovative solutions for decarbonization. This is one of the central topics within the platform of COP28. This workshop will present the results of an international survey across 10 countries to assess the perceived relevance and urgency of the creation and reskilling of competences for the energy transition and it will discuss how this process may be improved through international industrial cooperation.

Promoters of the workshop are MAIRE, an international Group developing integrated engineering solutions and sustainable technology solutions for the energy transition, and Fondazione MAIRE.

Institutional opening by the Italian Ministry of the Environment and Energy Security

First session:

### **Winning the challenge of climate goals through the creation of skills and competences worldwide**

- Introduction by **Ilaria Catastini**, General Manager of Fondazione MAIRE
- Presentation of the results of the international survey, by **Ferdinando Pagnoncelli**, CEO IPSOS Italia

Second Session

### **Energy transition as an opportunity for international industrial and institutional cooperation**

*Round table. Speakers:*

- **Francesco La Camera**, Director-General of the International Renewable Energy Agency (IRENA) (TBC)
- **Daniela Bernacchi**, General Manager of Global Compact Italy
- **Lorenzo Fanara**, Ambassador of Italy to the United Arab Emirates
- **Divya Reddy**, lead author of the International Energy Agency (IEA) report "Skills development and inclusivity for Clean Energy Transition".
- **Alessandro Bernini**, CEO MAIRE

Signing Ceremony for Industrial Cooperation in Energy Transition

Conclusions by **Fabrizio Di Amato**, Chairman of MAIRE and Fondazione MAIRE
