## Project sheet

Call for the implementation of some activities, foreseen by the functions defined by art. 34 of Legislative Decree 152 of 3 April 2006, on the implementation of the National Sustainable Development Strategy

TENDER NOTICE OF APRIL 24th, 2018

## Project summary - Local observatory on the Sustainable Development Goals (OSVIS)

<b>Purpose of the announcement:</b> To develop activities and initiatives aimed at disseminating and raising awareness on the issues of sustainable development and/or the circular economy.		
<b>Beneficiary:</b> “Insieme si può” – Social Promotion Association - Borgia (CZ)		
<b>Duration</b>	5 months	
	<b>Start date of activity:</b> 04/2019	<b>End date of activity:</b> 09/2019
<b>Specific objective</b>	The proposed initiative aims to inform and train the recipients, lower and high school students, on the importance of monitoring, the impact and repercussions that public policies have on daily life in general and, in this specific case, on the achievement of the sustainable development goals. The project has, as a general objective, to make students understand how the actions carried out at the local level contribute both individually and plurally in a decisive way to the success or failure of global objectives.	
<b>Description of the activities</b>	The data acquired locally, in each of the municipalities where the students reside or the schools are located, were used to carry out statistical analyzes and prepare graphical reports. With reference, for example, to SDG 6 water & sanitation, school laboratories, access to institutions and local authorities, inspections on the territory have been developed according to the following activities: <ul style="list-style-type: none"><li>- Acquire data on water consumption in the municipality of the school</li><li>- Acquire data and information on the quality of the water fed into the drinking water distribution network</li><li>- Acquire information and data on areas without a sewer network</li><li>- Acquire data and information on the volumes of water treated by purification plants</li></ul>	

	<p>Acquisition of data at the territorial level of Istat and other sources</p> <p>Using a spreadsheet, we proceeded to graphically represent the data, to analyze the different levels of territorial aggregation, to carry out evaluations of the temporal trend of the result indicators.</p>
<b>Output</b>	<ul style="list-style-type: none"><li>• Make students aware of the state of the environment and the influence of personal actions on the safeguarding of natural resources;</li><li>• Involve students in practical group activities to foster social inclusion and stimulate them on the importance of education and training;</li><li>• Relations with the institutions to understand the exercise of the right of citizenship;</li></ul> <p>Application of school notions in mathematics and science to analyze, re-elaborate and present the data found.</p>

## CORRELATION SCHEME BETWEEN THE ACTIVITIES CARRIED OUT BY THE PROJECT AND THE NATIONAL SUSTAINABLE DEVELOPMENT STRATEGY GOALS

The activities and actions of the project aim to stimulate students in "out of school" activities, in order to collect data and information on the state of the environment and the details of the SDG's themes. This action is consistent with the People area in relation to "Ensuring the conditions for the development of human potential" and, in particular, "Reducing the rate of school dropout and improving the education system" of the National Strategy for Sustainable Development (SNSvS). The laboratory activities for the verification of the progress of water theme indicators, connected to SDG6 Water 6 Sanitation, aim to develop awareness in the students in the behaviours implemented daily,

and on the repercussions of these behaviours on the environment, and on the consumption of resources. This action is consistent with the Planet area in relation to ensuring sustainable management of natural resources and, in particular "implementing the integrated management of water resources at all planning levels", and "maximizing water efficiency and adapting withdrawals to water scarcity "of the National Sustainable Development Strategy (SNSvS).
